
Collaborative exercise: Artificial Intelligence & Academic Integrity

Student Use of Unauthorized Artificial Intelligence

Case Study #3

A student has been accused of using ChatGPT to create an essay assignment. The instructor flagged that some of the references in the paper are incorrect. Despite that, the essay is well written and grammatically correct. The instructor suspects that the student did not write most of the essay.

The student argues that the instructor did not indicate that a tool like ChatGPT could not be used and that their essay is solid despite the minor problems with some references.

Moreover, the institution's policy on academic offences does not specifically state that such technology cannot be used.

As a group, complete the following activities:

1. Provide recommendations for the instructor to determine if unauthorized or inappropriate use of AI occurred
2. Provide recommendations on how the instructor might address AI use pre-emptively going forward
3. Paste the first activity/task into ChatGPT <https://chat.openai.com/chat>
 - a. Generate the response (or multiple responses) and copy and paste the response(s) to the Jamboard
 - b. Evaluate the response(s)
 - c. What are the strengths and limitations of the recommendations that ChatGPT generated?

Please use the Jamboard to record your answers. Enter the question – and your team's responses.
