**Summer Intensive Series (Season 2): Ethical AI and academic integrity
Biweekly webinars for integrity administrators May–July 2026**

What will we cover?

Teaching ethical use of AI as part of academic integrity training: **May 28**

This session will share value-based strategies for teaching ethical use of AI to all students as part of academic integrity training, and provide opportunities for discussion to apply these strategies to ethical scenarios.

Re-designing assessment for ethical use of AI: **June 11**

This session will present an Assessment Re(Design Toolkit) to help reframe GenAI as a design challenge for learning and assessment. The session will encourage a shift away from detection to making student thinking and decision-making visible in assessment approaches that prioritize ethical GenAI use and learner agency.

Investigating misuse of AI: **June 25**

This session will examine approaches to investigating student misuse of AI by academic conduct officers, and include advice about procedures, detection, evidence and outcomes.

Co-owning integrity work with students in the age of AI: **July 9**

This session will focus on the value of collaborating with students in work about ethical use of GenAI, so that academic integrity becomes a shared responsibility between students, faculty and staff.

Going forward with integrity, staying human: **July 23**

This session will consider the current AI-based challenges in academic integrity work and focus on the human durable skills as a way to navigate these challenges.

Speakers:

Dr Loretta Goff

**Dr Beatriz Moya
Figueroa**

Dr Cory Scurr

Dr Mike Fernbacher

Dr Justin Tonra

**Dr Shaun Lehmann
Jessa Kirk**

**Dr Tricia Bertram
Galant**

Dr David Rettinger
