Artificial Intelligence (AI) and Academic Integrity

Helpful Resources
- Visit the website of the International Center for Academic Integrity.
- Check out your university library.
- Try searching "(university name) AI and academic integrity".

How to Cite AI
- AI creates unique material. Include a full transcript of the AI generated content in the appendix of the document.
- As AI is not your own work, make sure to cite it!
- Check out official citation guidelines on the citation style you are looking to use.

Risks?
- Universities are integral to developing people's critical thinking skills.
- Employers will look to individuals who can think critically in ways AI cannot.
- Inappropriate reliance on AI may be a barrier to learning.
- AI may write papers that sound great at first, but the content could be false or misleading.

How to Use AI Appropriately
- How can we determine the primary sources that influenced the AI's response, and are these sources reputable?
- E.g., using AI as a tool to brainstorm general topics.
- E.g., reducing the burden of routine or repetitive tasks like spell check.
- AI is an assistant. It is not thinking - you are. You are the creative doer.
